

# Brake Flush Service

## Service de rinçage du système de freinage

## Can You See A Difference?

Brake fluid naturally attracts moisture, one of the leading causes of brake failure and repairs. The appearance of the brake fluid in the reservoir isn't always the best way to tell if it needs replacing. Look at your odometer, if you've gone over your OEM recommended service interval, or your brake fluid doesn't meet manufacturer's specifications, it's time to replace it.

## The Problem

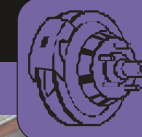

Moisture is naturally absorbed by brake fluid over time.

- Increasing moisture content:
  - Lowers the boiling point of the brake fluid, possibly causing sluggish brake response or brake failure during,
    - Panic stops.
    - Stop-and-go driving.
    - Downhill braking.
  - Contributes to brake component corrosion, possibly causing expensive repairs.
    - An ABS brake assembly costs as much as \$1,000.00.

Brake fluid oxidizes and degrades over time.

- Contributing to sluggish brake response and premature brake component repairs.

# IT PAYS TO BE SAFE

*When it comes to safety, nothing is more critical than your brakes. Since the deterioration of the brake system is so gradual, you're less likely to notice a problem until it's too late. A brake flush service should be part of your normal maintenance schedule.*

*Make sure it's Wynn's.*

## Keep your vehicle safe with a fast and complete Wynn's® Brake Flush Service

## The Solution

Completely flush the system of old brake fluid.

- The complete brake system is flushed with the state-of-the-art Wynn's Brake Flush Machine.
  - New brake fluid is fed into the master cylinder reservoir.
  - All four wheel cylinders are simultaneously bled.
  - All moisture and air are eliminated from the brake system.
- Wynn's brake fluid exceeds U.S. Department of Transportation specifications.
- The service helps extend the life of brake system components and provides brakes you can count on in all situations.
- Environmentally correct service contains all used brake fluid to minimize technician exposure.
- Wynn's keeps you on the road with confidence.

*For safety and the life of your vehicle, make sure a brake fluid service is a part of your normal maintenance schedule. With Wynn's, you have over 60 years of auto-care experience ready to help you avoid breakdowns and other expenses.*
